Luis Alberto Núñez Sánchez

Guadalajara, México | lans1192usa@gmail.com | +52 33-3626-6220 | luis-n | Luisns92

Professional Profile

Data Scientist | Machine Learning Applied to Financial Decision-Making with intensive training in statistical analysis, machine learning, and Python programming. Hands-on experience across the full data project lifecycle: data collection, cleaning, predictive modeling, and results visualization. Analytical and results-driven professional with strong adaptability. I combine financial expertise and technical skills to transform data into strategic business decisions. Proficient in Python (Pandas, Scikit-learn, SciPy), SQL, data visualization (Matplotlib, Seaborn, Plotly), and advanced Excel analytics.

Education

Data Science Program, Tripleten — Mar 2025 – Jan 2026

Bachelor's Degree in Financial Management, ITESO University — Aug 2014 – May 2019

Projects

Customer Churn Prediction (Telecommunications Sector) — github.com/Luisns92/s18

- Developed a classification model to detect potential customer churn and enable proactive retention strategies.
- Applied class balancing techniques and One-Hot Encoding.
- Identified key variables influencing service cancellation.

Age Detection from Images — github.com/Luisns92/s17

- Trained a deep learning model to identify age-related features for automated age verification processes.
- Conducted full exploratory data analysis (EDA).
- Technologies: TensorFlow, ResNet50

Movie Review Sentiment Classification (NLP) — github.com/Luisns92/s16

- Built a model to classify movie reviews as positive or negative.
- Achieved 95% prediction accuracy (AUC-ROC).
- Technologies: PyTorch, spaCy, NLTK, BERT

Vehicle Price Prediction Model — github.com/Luisns92/s14

- Implemented gradient boosting models to accurately predict current vehicle market value.
- Performed hyperparameter optimization.
- Technologies: LightGBM, CatBoost, XGBoost

Gold Recovery Prediction (Heavy Industry) — github.com/Luisns92/s12

- Developed a predictive model with 1.18% SMAPE error.
- Implemented advanced missing value treatment and interpolation.
- Applied cross-validation techniques to ensure model robustness.

Oil Well Investment Optimization — github.com/Luisns92/s11

- Built a model to select the optimal investment region for a 100M USD capital allocation.
- Conducted profitability analysis to reduce financial losses.
- Análisis de rentabilidad y reducción de pérdidas.

Experience

Construction Supervisor – Aaron´s Excavating — Abroad, Aug 2021 – Oct 2024

- Quickly learned company structure and operational processes, mastering heavy machinery operations at a top-performance level.
- Improved process efficiency, reducing project completion times and increasing company profitability.
- Became a trusted and reliable team member.

Sales Advisor – Mazda Galerías — Guadalajara, JL, Jan 2020 – Jan 2021

- Accelerated learning curve and won the departmental sales award in the first month.
- Built strong client relationships, achieving high customer satisfaction and referrals.

Finance Director – PH Proyectos de Celebración (Events Weddings) — Guadalajara, JL, Mar 2018 – Jan 2020

- Built the company's administrative and financial structure from scratch.
- Provided financial clarity and operational solutions.
- Managed company financial resources with full trust and responsibility.

Financial Analyst Intern – Bansí Bank — Guadalajara, JL, Jul 2017 – Jan 2018

- Analyzed client financial profiles to support loan approval and risk assessment processes.
- Gained knowledge of internal banking procedures and credit evaluation frameworks.

Financial Assistant – Casa Gaby Eventos — Guadalajara, JL, Mar 2014 – Aug 2017

- Designed and developed spreadsheets and documentation to streamline financial processes.
- Presented financial results clearly and concisely for decision-making purposes.
